## I Spy

Think of something that you and everyone else playing can see. Then think of the letter that starts word. Say the rhyme " I spy with my little eye something beginning with \_\_\_". Take it in turns to guess what has been spied.

## It begins with.....

Decide on a topic...it could be animals, food and drink, countries, places, names. Then the first person starts with the letter A and they must name something in that topic beginning with the letter A, then the next person says something beginning with the letter B. i.e. if you are playing food and drink the first person would say apple, the next banana, the next carrot and so on.

## Counting Cars

Choose a colour and then see how many cars you can see that colour. You can play in teams or separately. Set a time limit like ten minutes. Whoever sees the most cars in that colour wins. You can make this harder for older kids and give each colour a set amount of points. We call this "snooker cars" and the points are as follows:

Red - 1 point

Yellow - 2 points

Green - 3 points

Brown - 4 points

Blue - 5 points

Pink - 6 points

Black - 7 points

## Sing a Line

Decide who is going first. The first person sings a line from a song, then the next person sings a line from a different song and so on. You only get 10 seconds to think and if you can't sing a line you are out.

## What am I?

Decide who is going to start. They must think of an object or thing. It could be an animal, character, hero, anything at all. Everyone takes it in turn to ask a question to try and find out what the person is. The person who has started can only answer yes or no. You must wait for your turn to guess if you think you know what the person is. Whoever guesses correctly first is the winner and they then decide what they are and everyone else must guess.
